In the calm and quiet waters of Lugano's lake, in one of the 20 most beautiful towns in Italy (skyscanner.it), is born the idea of "Botel spread of the Lakes".

"Here, in the countryside and surrounded by mountains, lies the beautiful town of Porto Ceresio, a handful of houses overlooking the crystal waters of the lake where the atmosphere is cool and clean in all seasons."

A sustainable holiday with zero impact on the units' floating "off grid"; Botel 2.0 is a philosophy of life, the approach to the territories on tiptoe.

Botel 2.0 will allow you to enjoy, on the floating dock, food and wine with its network of "popular restaurants."

Reach by boat the 'most charming spots on the lake, or you can visit the Citta' di Lugano and the beautiful village of Morcote, or, with the reactivation of the old railway line, reach Varese.

You can walk the trails that will take you to Monte San Giorgio (UNESCO site), and in the evening relax on the Botel 2.0 jetty while enjoying local dishes.

You will be attended to every need from Reception Botel 2.0.0 but you will have the maximum autonomy to access and use the unit you choose for your holidays.

The units are air-conditioned and heated and equipped with every comfort (kitchenette, bathroom with shower, indoor and outdoor dining, solarium, master bedroom with double bed and sofa-bed).

They are solar and wind powered, and equipped with a closed-loop water purification system – and produce no emissions into the environment.
